U

## 15 (Four times amended) A large printer comprising:

a sheet feeding area including at least one roll of paper and at least one sheet of paper;

and

a cover member, which covers a first feeding path for the roll of paper from above, and which supports the sheet of paper from below to constitute a part of a second feeding path for the sheet of paper,

wherein the cover member extends linearly from an upstream portion thereof to a downstream portion thereof in connection with a direction in which the sheet of paper is fed, and wherein the cover member is disposed between the sheet of paper and the roll of paper at a tocation in the sheet feeding area at which the roll of paper is in a rolled shape.
